

Modern Cabinetry

How to measure for cabinets

Directions:

1. Draw your walls out just like the example above. Measuring length of all walls needing cabinetry.
2. Measurements of all windows, pass through or any obstructions.
3. Dimensions of all appliance are necessary (Fridge, stove/cooktop, microwave, dishwasher etc.)
4. Sink dimensions and style (drop-in, undermount, farmhouse etc.)
5. What is your ceiling height? This determines how tall your upper cabinets will be.
